Letters

Service standards for sexual health
Madam
We fail to understand why Dr Stephen Searle1 feels that implementing the Faculty's Service Standards2
within our service, carried out in 2000, we
were able to provide a high-quality, continuously improving, patient-centred care, as the new service has a clear chaperone policy or protocol, which allows for the protection of both client and clinician.

James T McVicker, MBChB, MFFP
Associate Specialist, Abacus Clinics for Contraception and Reproductive Health Care, North Liverpool PCT, 46–46 Dale Street, Liverpool L2 5SF, UK

Madam
I would like to respond to the letter by Stephen Searle in the April 2004 issue of the Journal on behalf of the Clinical Committee of the FFPRHC.1 The reason for the lack of change in the FFPRHC Clinical Effectiveness Unit (CEU) that IUDs should be fitted at 7–10 days post-medical TOP, allows safe insertion of both copper IUDs and Mirena IUS and should be promoted.
