
War is a great horror. All right-thinking people agree on this. War has brought more misery to humanity than any other single thing. Why, then, do we as a species indulge in it so often and so easily? This question has never been as urgent as it is today. The world has never been more fraught and humankind’s ability to destroy itself is today. The world has never been more

BOOK REVIEW

Lubrication...naturally

SYLK natural personal lubricant for the alleviation of atrophic vaginitis is now included within the NHS Drug Tariff Part IX and available on an FP10.

Adopted and endorsed by a multi-professional group investigating the use of vaginal dilators following pelvic radiotherapy, as well as members of the National Committee of the National Forum of Gynaecology Oncology Nurses (NFIGN) and other relevant groups within the NHS, SYLK:

- has a non chemical base derived from an extract of the kiwi fruit plant that effectively mimics a woman’s natural secretions and is the only paraben free lubricant
- has passed cytotoxicity, sensitisation and product stability tests. The pH of SYLK is controlled within 4.5 to 4.7, to equate with the vaginal environment
- is a class 1 medical device available in one 40ml size, sufficient for up to 150 applications

Free samples and consumer literature are readily available from:
