Supplementary Table 1. Cox proportional-hazards regression analysis on women's age, serum AMH and TMNC as predictors of time to pregnancy.

Covariate	b	Exp(b) (95% confidence interval)	P
Women's age (years)	-0.11	0.90 (0.83 – 0.98)	0.012
Serum AMH (ng/ml)	0.07	1.07 (0.97 – 1.17)	0.160
TMNC (million)	0.03	1.03 (1.00 – 1.07)	0.067

Supplementary Figure 1. Survival curve showing conception probability with time.
